

- Noise Protector** Less noise(Silenced type)
- Cushion Damper** Absorbs repercussion from hammering and increases carrier endurance
- Roomier Gas Chamber** Ensures higher impact power
- Stroke Adjuster** Maximize productivity from variable speed control (D&A 70V~550V)
- Main Valve** Internal control valve system is more efficient by 10% to 15% than other breaker's valve, stays cooler and makes the quicker and harder-hitting
- Auto-Lubrication System** Available to install Auto-Lubrication or centralizing lubrication kit (D&A 130V~550V)
- Accumulator (over D&A 30V)**
  - Less stress to hydraulic components as absorbing pressure fluctuation
  - Increases efficiency by replenishing short oil flow
- Rock dragger with anti-abrasion steel** Used anti-abrasion steel (Hardox steel)
- Wide Chisel pin** Safe from abnormal wearing
- Piston** Higher impact power with long stroke
- Well heat-treated tool** -Longer life by good material
